**RFP-10-04**

**LOUISIANA PUBLIC SERVICE COMMISSION  
REQUEST FOR PROPOSALS ("RFP")**

In re: Application for RFP for outside consultant for Entergy Louisiana L.L.C fuel audit.

The Louisiana Public Service Commission, at the April 21, 2010 Business and Executive Session (“B and E”), directed staff will initiate fuel audits for a number of electric and gas utilities. Staff anticipates the need for outside consultants to assist staff in the fuel audit of Entergy Louisiana, LLC (“ELL”).

This request conforms with the directives of Louisiana Public Service Commission General Order dated August 4, 2004. The General Order states in pertinent part that “Contract attorneys and consultants shall be retained by the Commission only in those instances in which the Commission has determined that such is necessary for the Commission to fulfill its constitutional mandate, due either to insufficient available manpower within existing Commission staff, or the necessity of specific areas of expertise not represented within existing Commission staff.”

## **I. Scope of Representation**

The independent technical consultant retained by the Commission shall assist the Commission’s Legal and Audit Division in analyzing fuel purchases and usage by ELL for 2005-2009 beginning from the date of the last audit. In performing this duty, the consultant shall draft and assist in the drafting of data requests; analyze data responses; participate in formal status conferences, pre-trial conferences, depositions, and hearings; draft and prepare audit memoranda and/or pre-field testimony in support of Staff’s ultimate recommendations, together with exhibits supporting the memoranda and/or pre-filed testimony; and assist in the drafting of applicable motions, exceptions, briefing sheets and orders of the Commission. Additionally, the consultant shall be available to participate in informal conference calls, meetings and conferences with the Commission and its staff as well as attending any Business and Executive Sessions that the Staff deems necessary. The scope of the work shall continue through the conclusion of the docket through Commission vote, regardless of whether said vote is the result of a stipulated agreement or contested hearing recommendation.

The Commission's auditors shall conduct an audit of the utility’s accounts and acquisition activities to determine the accuracy of those cost recovered by the company through its “Fuel Adjustment Clause or Rider” that do not equal the actual cost of fuel burned or consumed in its generating facilities and the cost of purchase energy.

The auditors shall implement an audit program that reflects past and current conditions to verify the proper recording of fuel transactions and to determine the propriety of the account treatment of purchased power and interchange transactions.

The audit procedures shall include but not be limited to:

- a.) A review and analysis of the utility’s monthly comprehensive fuel adjustment reporting requirements filed with the Louisiana Public Service Commission.
- b.) If applicable, the development and improvement of internal staff procedures to effectively monitor and evaluate a utility’s performance in areas impacting the fuel and purchase power cost which are reflected in the utility’s monthly fuel adjustment filings with the Commission.
- c.) A review and analysis of the utility’s monthly comprehensive fuel adjustment filings to assure compliance with all pertinent state and federal regulations.

The audit shall also include:

- a.) a determination if fuel and associated costs are properly identified and recorded in the appropriate uniform system of accounts,
- b.) a determination if purchased energy and associated costs are properly identified,
- c.) an assessment of a utility's practices for economical purchase and use of fuel and electric energy, and

- d.) an assessment of the relevant contract terms and conditions and any variations from contract terms.

The audit staff shall report its findings in writing to the Commission, identifying any irregularities detected in the monthly fuel adjustment calculations that were incorrectly assessed and applied to Louisiana consumer billing statements or which allowed for the recovery of these unauthorized expenses by the utility. The report should also include a written or executive summary which identifies any cost included in the audit found to be in violation and a recommendation as to the appropriate methodology to be utilized by the Commission to provide for recovery of these funds.

## **II. Period of Representation**

The time period estimated to complete this docket is estimated at approximately 18 months. This is merely an estimate and may vary greatly depending upon whether the matter is contested, and as such the Commission makes no representations as to the accurateness of the Period of Representation.
